

Is your monitor off?

On average, **computer monitors account for more than 50%** of a computer's total energy use!

ONE computer monitor left on 24/7 costs about **\$45.00** per year
(An entire computer? Close to \$90!)

For every **10** computers here at the office...

Monitors left on could cost us \$450.00 per year!

Help us reduce energy use and control costs.

When you shut down your computer, **don't forget the monitor!**
