

Best Practice 26 (Renewable Energy), Action 1 – Adopt solar energy standards or a wind energy ordinance that allows or encourages appropriate renewable energy installation.

1 – Star Rating

The City of Warren has reviewed its zoning ordinances and codes to removing any barriers to solar and/or wind energy installations in regards to land use; SolSmart is also looking over local zoning and code to determine if there are any restrictions that weren't removed.

There are three potential locations that have been assessed for solar capabilities; two of the three are adequate and optimal locations that have been viewed by potential solar contractors.
